3. GLINFO	4
Document Format	5
Section Format	5
Step Format	5
Final Build Deploy to PreProd	6

Pre-requisites

- All prior releases for iCAM must have been installed in the target environment prior to the execution of this install checklist.
- The Final Build must be created prior to the execution of this checklist.

Assumptions

- Restoration of the PreProduction databases from a Production backup is not included within this checklist.
- It is assumed that no hotfixes will be made to Production after the Final Build packages are created. If this is not the case, appropriate steps must be added to re-deploy the hotfixes which are not included in the Final Build packages.

Schema Changes

1. CORPINFO
2. LEASEINFO
3. GLINFO

Document Format

Section Format

I. Implementation Tasks

- Deploy database schema alterations, data and compiled code to the PreProduction environment
